MANAGEMENT AND DISCUSSION & ANALYSIS REPORT

INDUSTRY STRUCTURE AND DEVELOPMENTS:

Chemical industry is an important constituent of the Indian economy. Its size is estimated at around US \$ 35 billion approx., which is equivalent to about 3% of India's GDP. The total investment in Indian chemical sector is approx. US \$ 60 billion and total employment generated is about 1 million. India also produces a large number of fine and specialty chemicals, which have very specific uses and are essential for increasing industrial production. These find wide usage as food additives and pigments, polymer additives, antioxidants in the rubber industry, etc.

Magnesium is the primary alloy element in the aluminum alloy with an annual industry demand in excess of 160000 tonnes globally. Magnesium alloys also play a critical role in the building and construction, transport, defence, electronics, chemical and aerospace industries. With all these sectors experiencing a huge growth impetus, it has become imperative for the Indian manufacturing sectors to keep up to date with the latest global technologies and developments that impact the use of magnesium and its alloys.

OPPORTUNITIES, RISKS, CONCERNS THREATS & OUTLOOK:

We are focused on increasing our market share of existing products, launching new products, creating foot prints in untapped growth market segments in export market and forging strong relationship with customers, laying thereby a robust foundation for sustainable growth.

The year 2011-12 looks promising with its own sets of challenges and opportunities for us and it is expected that there will be growth in chemical industry. The population growth is a good sign towards the optimistic future market.

With global recession and idle/new capacities abroad and a stronger rupee, there is increasing threat from imports. Steep increase in imports into the country and withdrawal of safe guard duty are the concerns for the product/division.

INTERNAL CONTROL SYSTEMS & ADEQUACY:

The Company has established an appropriate system of internal control to ensure that there exists a proper control over all the transactions and that all its assets are properly safeguarded and not exposed to risk arising out of unauthorised use or disposal. The Internal Audit conducted at all divisions for all the key areas of business. The Internal Control System is supplemented by a programme of Internal Audits to ensure that the assets are properly accounted for and the business operations are conducted in adherence to laid down policies and procedures.
